NO ALCOHOL  
NO CALORIES  
NO HANGOVER  
HAPPY LIVER

SCIENCE-BASED,  
CLINICALLY-PROVEN  
OUTCOMES  
ANTI-INFLAMMATION  
ANTI-ANXIETY

# Project Constraints & Procurement

## Construction Management

- Very flexible; accelerated delivery
- Owner bears schedule and cost risk
- Contract: CCDC 5A and CCDC 5B

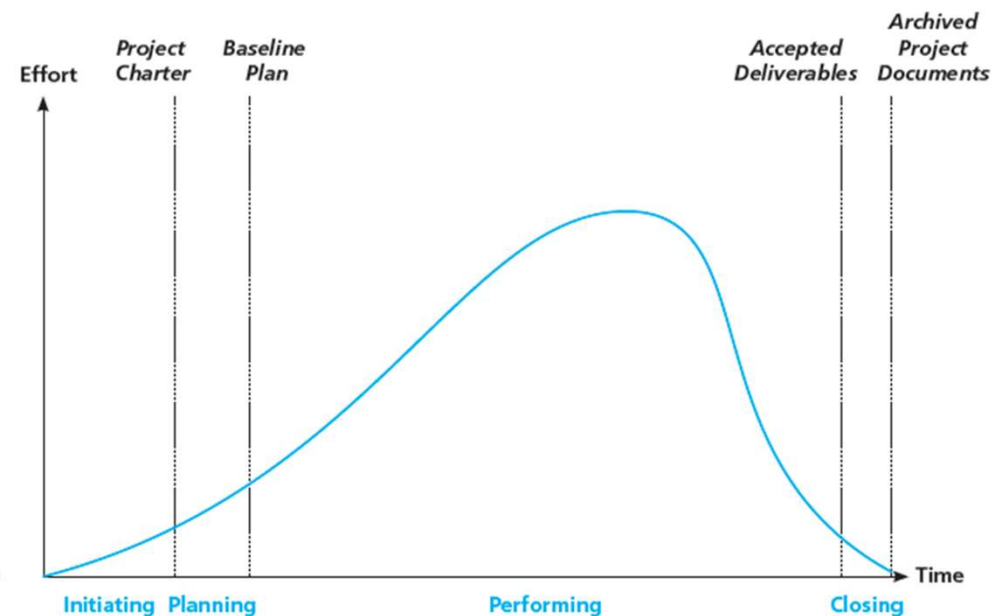

# Common Project Issues

- Failure to identify all user requirements
- Failure to identify user requirements properly
- Continuing growth of project scope
- Incompatible hardware
- Logical design flaws
- Failure to select the best design strategy

# Performing Phase

- Accomplish project objectives
- Increase pace as more resources are added
- Monitor and control progress
- Take corrective action
- Manage and control changes with sponsor approval
- Achieve customer satisfaction with acceptance of deliverable

FIGURE 1.2 Project Life Cycle Effort

# Managing Change

## Control Steps

1. Analyze the need for corrective action
2. Decide specific corrective actions to be taken
3. Revise the plan to incorporate corrective actions
4. Recalculate the impact to evaluate the effects of the planned corrective actions

## Actions

- Repeat steps if not acceptable results
- Apply efforts to paths with negative slack
  - Near-term activities
  - Long estimated durations
- Change may shift critical path
- Trade-off of costs and scope

# The Process of Change

What is Change, and how do we map it?

# What Does “Change” Mean?

To make, or become different

Consider:

- Is change HARD or EASY?
- Is there a difference between “make” and “become” different?

# The Process of Change

# Earning Trust vs. Granting Trust

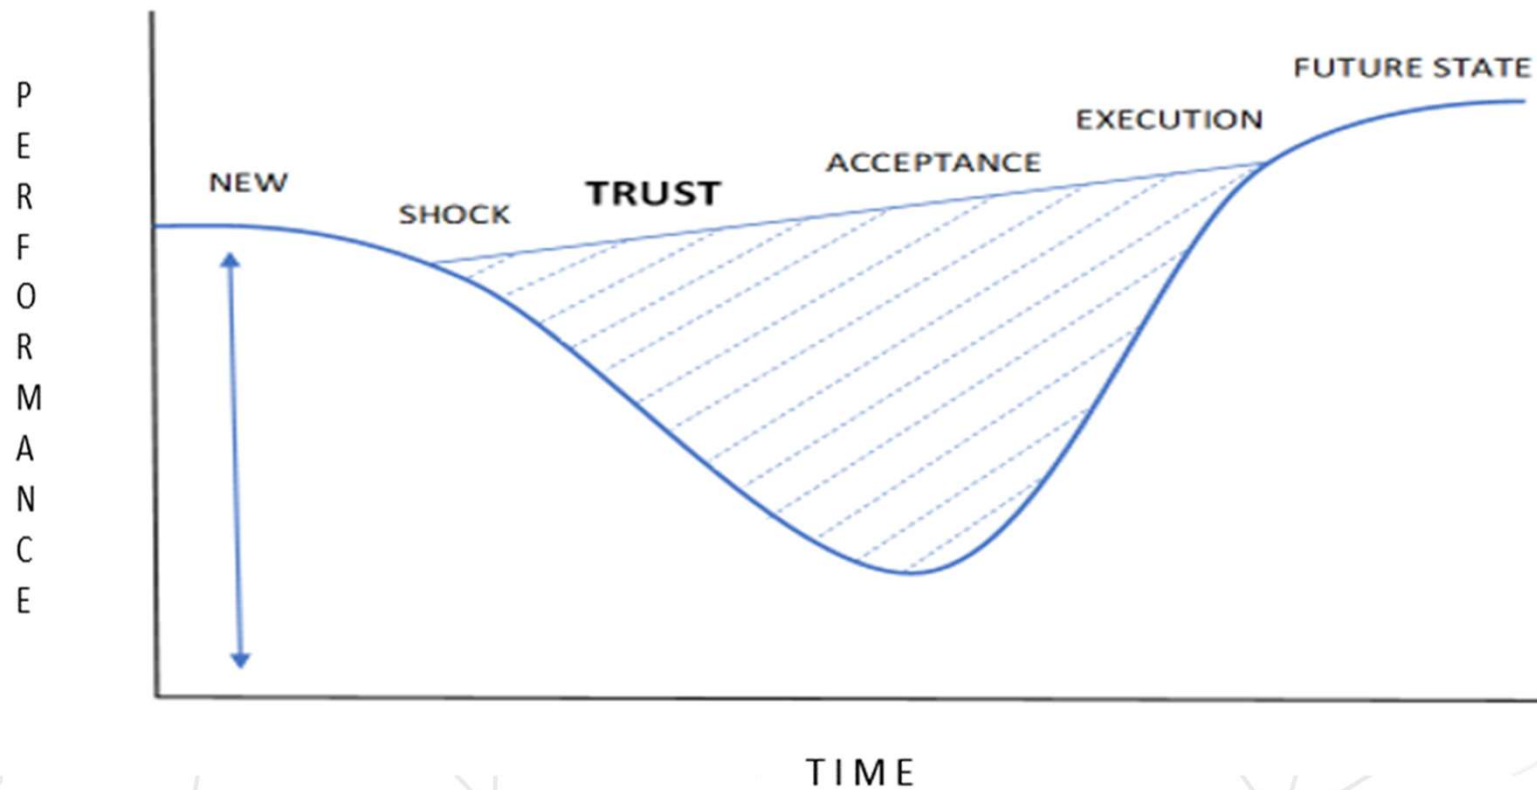

## What does Trust Mean?

Assured reliance on the character, ability, strength or truth of someone or something, one in which confidence is placed.

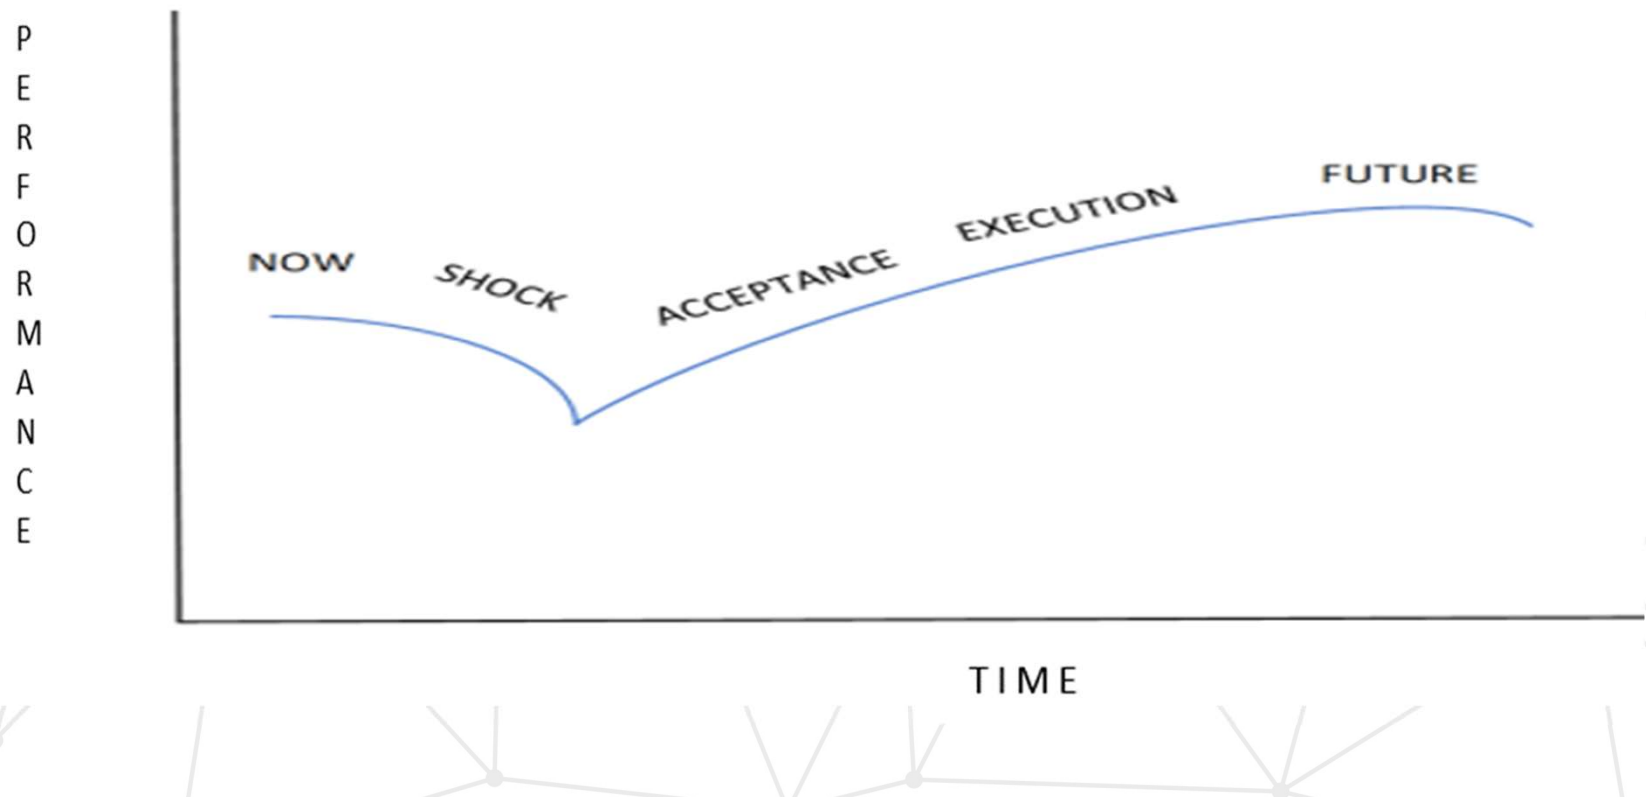

## Consider:

- Do you grant trust? Or do people have to earn your trust?
- Is there a difference?
- How do you think this is related to your performance at work?
- How do you think this is related to Culture & Engagement?
